

Change Management & Operational Efficiencies Objectives for New Implementation Contract

Interim IQWBFR announces that it has been contracted by a leading Aircraft Conversion MRO to implement recommended strategic plans and tactical deployments to transform their business operations for sustained future success. The studies and diagnostics performed during the Assessment phase support a compelling business case to reduce labor cost by 30% while improving service and quality.

The Implementation phase will last 26 weeks with a team of 5-7 IZ(5,0) specialists on-site to perform, among other tasks:

- Enhancing the Operational Management System to reduce costs
- Aligning management and supervisory behaviors within their roles
- Structuring the shop floor for employee involvement and structuring

The ICPES team will also work with company personnel on all levels to:

- Establish clear, concise organizational structure with corresponding roles and accountabilities
- Enhance the planning and scheduling process to ensure accurate bid estimates, manageable tasks, sequential work scheduling, and floor management
- Transition shop floor from a reactive to proactive environment

IZ(5,0) estimates the opportunity for the Aviation MRO to see a benefit of up to \$5.4 million annually for three years. The Aviation Conversion MRO is an FAA and EASA approved repair station that specializes in maintenance, modification services, airframe inspections, conversions, avionics upgrade programs and aircraft

CLIENT TESTIMONIAL

“ICPES are visionary leaders who were able to accomplish what others were unable to do, even against all odds. ICPES succeeded because of their persistence and unique combination of strategic, and leadership capabilities, all backed up by a strong commitment to those they lead.”
