

Workflow, Organizational Realignment & Operational efficiencies Delivered to Leading High-Temp Furnace Manufacturer

INTERIM CEO Business Partners (INTERIM) completed a successful Assessment for a manufacturer of industrial high-temperature vacuum and controlled atmosphere furnaces for a variety of industries including Aviation, Electronics, Nuclear, R&D Labs, and Medical. The Company develops custom furnaces to meet industry needs, configured by size specifications, temperature ranges, and applications.

SUMMARY – Assessment Focus on Operational Optimization and Transformation

Areas targeted during the Assessment were Engineering, Procurement and Shop Scheduling. In each area, the **“Work Management Process”** was evaluated which includes – work definition, work planning, work scheduling, work execution, work documented and work analysis and measurement. These 6 areas are the fundamentals of improving the workflow in all departments of a company.

ABOUT INTERIM

Established in 2005, INTERIM has assembled a roster of seasoned executives and professionals from many industries to contribute their expertise to “Transform” and “Optimize” core business processes to tune-up well performing or under-performing companies for Privately and Publicly Owned Companies, Private Equity and Investment Banking Firms.

To meet challenging business goals and objectives, the INTERIM Team establishes financial, operational, strategic, and tactical “Road Maps,” to achieve sustainable results in the shortest period leading to progressive profitable growth.

INTERIM Delivered:

A concise prioritized operational improvement action plan for the Company in the Departments of Engineering, Procurement and Shop Scheduling utilizing the **“Work Management Process”** to define the **“Current State”** of each Department then establishing a **“Future State Action Plan”**.

“Bottom Line” – The Company has a clear path for transforming and optimizing Engineering, Procurement, and Shop Floor Scheduling which will allow the Company to increase capacity meeting the increased backlog/forecast while delivering customer expectation. This will lead to improved revenue and
