

OPERATIONAL REVIEW OF WORKFLOW EFFECTIVENESS AT LEADING BUSINESS AIRCRAFT OEM/MRO SERVICE PROVIDER

Overview

INTERIM CEO and Business Partners completed a successful operational review for a leading Business Aircraft OEM and MRO services provider. The service provider has specialized over the decades in developing and delivering Business Aviation OEM solutions and services.

OBJECTIVE

INTERIM's objective was to observe operational challenges and determine actions that can provide immediate impact in creating an effective and efficient operation while identifying and focusing on high-level workflow challenges, program schedules, and key leadership alignment.

SUMMARY

Areas targeted during the Operational Review were Corporate Priorities, Department Alignment, Communications, IT Strategy Implementation & Execution, Procurement and Production Scheduling. In each area, the current state “**Work Management Process**” was observed which included - work definition, work planning, work scheduling, work execution, work documented and work analysis along with their current measures. These 6 areas are the fundamentals of improving the workflow in all departments of a company.

About INTERIM
