

Company Wide Transformation and Optimization for Leading Shielding OEM

Overview

INTERIM CEO and Business Partners (INTERIM) completed another successful Company Wide Transformation for a leading OEM Industrial Shielding (RF, EMI, EMP, MRI, HEMP, Data Centers) Company. The company has specialized over the decades in developing and delivering complex solutions for the Government, Healthcare, Data Centers, and Critical Infrastructure and Utilities.

OBJECTIVE

INTERIM's objective was to evaluate operational/business challenges in each department and deploy actions that can provide immediate and long-term impact creating an effective and efficient business structure for both top line and bottom-line profitability.

Results - Company Transformation

The combination of performing a full Operational Assessment and then Implementing the Findings from the Assessment has led to a successful engagement. INTERIM has implemented effective workflow strategies in each department, deployed an effective organizational structure - including complete restructuring of the Engineering Department and Program

Management, realigned personnel to effective positions including reorganizing the executive staff, established operational strategies for the proper use of each “System Records” (ERP, Zen Desk, CADLink), efforts have led to successful contract wins, a higher level of customer satisfaction, morale has been rejuvenated, financial stability achieved, and a foundation has been established that can lead to a successful exit.

About INTERIM
